

SETTING UP APPLICATION ENVIRONMENT FLASK PROJECT

Date	6 October 2022
Team ID	PNT2022TMID19295
Project Name	SKILL AND JOB RECOMMENDER APPLICATION
Maximum Marks	8 Marks

The screenshot displays the Visual Studio Code interface with a Flask application project. The Explorer panel on the left shows the project structure, including folders for assignments and files like `profile.html` and `main.py`. The main editor window shows the `main.py` file with the following Python code:

```
1 from flask import Flask, render_template
2
3 app = Flask(__name__)
4
5 @app.route('/')
6 @app.route('/index')
7 def index():
8     return render_template('index.html')
9
10 @app.route('/about')
11 def about():
12     return "<h2>Developer : P.Navinkumar</h2>"
13
14 @app.route('/login')
15 def login():
16     return render_template('login.html')
```

The TERMINAL panel at the bottom shows the output of running the application:

```
* Serving Flask app 'main'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server in
stead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 328-013-878
```

The status bar at the bottom indicates the file is `main.py`, last modified 2 weeks ago, and the Python version is 3.10.7 64-bit.
